

Creative PRC Office Visit Ideas

The PR coordinator is responsible for a practice's PR, marketing, networking, etc., and they visit general dental practices to build relationships and gain referrals to their specialty practice. Specialty practices get 90% of their patients through referrals from general dentists, so they are constantly seeking ways to provide education, appreciation, development, and convenience to keep the relationships flowing.

We surveyed the top PRCs in the offices we consult to see how they handle various situations and keep up with creative/fun ideas for office visits. The following information was collected from those survey results.
