

Mobile Payment Options

To accept payments via a customer's mobile device, there are a variety of different technological options you can consider. Use the table below to view a list of the most popular options.

PayPal Business/ Venmo	<ul style="list-style-type: none">• Flat rate 2.9% + \$0.30 per transaction• No monthly fees• Integrates with Venmo• Patient bills can be sent via app or email, or scanned with QR code• Payment confirmations sent to patients• No app needed when sent via email• Encrypted payments <p>https://www.paypal.com/us/business</p>
Eyewear	<ul style="list-style-type: none">• Flat rate 2.6% + \$0.15 per transaction• \$15/month fee (waived during COVID crisis)• Unlimited pay stations and no device fees• Customers can pay via text message link or scan a QR code• No app to download or log in for patients to create• Cancel at any time• Ability to set up and run transactions in approx. 24 hours• Encrypted payments• iOS based, so an iPad is needed to send payments at this time (a full web interface is under development) <p>https://www.safedistancepay.com/</p>

Square Cash for Business (CashApp)	<ul style="list-style-type: none">• Flat rate 2.7% per transaction• No monthly fees• Integrates with CashApp• Patient bills sent via app• \$1,000 limits on amount you can receive in a 30-day period without providing Square more information about your business (e.g., Tax ID, banking info, etc.)• Patients need app to receive payment requests• Encrypted payments <p>https://cash.app/</p>
Weave	<ul style="list-style-type: none">• Full patient communication software suite (like Lighthouse)• Part of a full suite package that includes touchless pay options• Per transaction rates determined by a practice analysis• Stripe is the merchant vendor, so you need both Stripe and Weave for text-to-pay <p>https://www.weavehelp.com/set-up-payments</p>
