

ePRACTICE ANALYSIS

A customized blueprint for next-level growth.

At ePractice Manager, we implement personnel and training systems that reduce the management burden and allow the doctor to focus on patient care.

Dealing with staff situations, patient flow, marketing, the front office, and other organizational issues is often distracting and frustrating. ePractice Manager's tailored consulting programs can quickly resolve these issues, and create smoother running and more productive practices.

Each Analysis includes a detailed evaluation of your practice, a comprehensive report of findings, recommendations, and a strategic implementation plan.

- Immersive study of Key Performance Indicators (KPIs).
- Review of all practice systems, from front to back.
- Marketing analysis and recommendations.
- Clarify goals and objectives for the practice.
- Clear blueprint to implement action plan.
- Tools for staff development and training.

Each program tailored to address the specific needs of your practice.

"ePractice Manager completely transformed the way we do things. Now every week, every month we have milestones to hit and the one-on-one support we need to reach them."

S.J. *.O.M.S*

"It's allowed me to focus more on patient care and less on day-to-day management issues, and I can now delegate to staff. I've done better this past June than the two years prior!"

S.D. *O.M.S.
M.D.*

"Their comprehensive webinars, onsite office visits, and coaching interaction has brought incredible value to our entire team, including customized strategic development plans for every role in the practice.."
